

There exist several methods to design forms with fields to fields may be surrounded by bounding boxes, by light rectangles or methods specify where to write and, therefore, minimize the effect with other parts of the form. These guides can be located on a sheet is located below the form or they can be printed directly on the form a separate sheet is much better from the point of view of the quality but requires giving more instructions and, more importantly, restricts this type of acquisition is used. Guiding rulers printed on the form used for this reason. Light rectangles can be removed more easily whenever the handwritten text touches the rulers. Nevertheless, some things should be taken into account: The best way to print these light rectangles
